

We put water to work!

PMW's Industrial Parts Washers can clean your parts, transmissions, wheels, and tools.

Your parts washer comes with a single basket for multiple parts cleaning. There are various options available. You may need to clean so many parts, you might need two baskets! Let our engineers help design what is right for your needs.

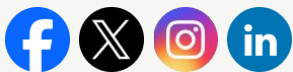

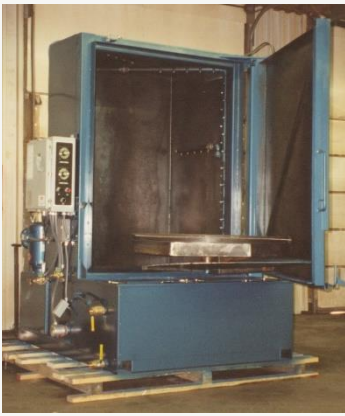

Keep your buses running and make your work more efficient with a PMW parts washer!

A clean and efficient way to help your maintenance team get their work done in a more modern fashion.

PMW has many washer sizes. There is one size for your team that will meet all of their needs. Transit companies who do their work in house have used these to clean their engine parts, transmissions, and you can use one size to do it all.
